

Emergency Management Fact Sheet

Functional Role

The Emergency Management program ensures the creation of plans through which the Campus reduces vulnerability to hazards and copes with disasters.

Program Objectives

- Develop plans, procedures, and activates to prevent or diminish hazards.
- Develop and conduct trainings, exercises, education and outreach to the Campus Community.
- Maintain the ability to activate the Campus Emergency Operation Center (EOC) in support of response efforts.
- Activate continuity plans to ensure the Campus mission.

Program Elements

Mitigation: Develop plans, procedures, and activities designed to prevent, diminish or mitigate hazards.

Preparedness: Design strategies, processes and activities to prepare the University to effectively respond to potential emergencies. This includes training, education and outreach, exercises and drills, developing an emergency communication plan, collaborating with local and state agencies and community partners, and maintaining an emergency notification system.

Response: Maintain the ability to activate the ICS structure and the EOC, dialogue with first responders to make informed decisions, determine and execute the appropriate response strategies, activate the emergency communications plan, and account for students, faculty and staff.

Recovery: Activate continuity and recovery plans to restore business operations and academic and research environments, promote psychological and emotional recovery.

Regulatory Compliance

Federal:

- *Regulation* HEOA-Higher Education Opportunity Act- Timely Warning and Emergency Notification
- *Regulation* OSHA 29 CFR 1910.120(q) Hazardous Waste Operations and Emergency Response
