

UCSB Surplus Chemical Program

UC Santa Barbara's Surplus Chemical Program reduces chemical waste generated on campus by reusing chemicals instead of disposing of them as hazardous waste. When a laboratory shuts down, moves or no longer needs a specific chemical the program tries to find a lab that can use the chemical in their research. This saves the campus money in two ways; the lab does not have to purchase a new chemical and the campus does not need to pay to dispose of it. It also saves the environment by not needing to produce the new chemical and by avoiding the long transportation that is required to dispose of the chemical at an approved disposal facility. Reusing chemicals is a sustainable way to minimize waste generated by the campus.

The Surplus Chemical Program is operated by Environmental Health & Safety (EH&S) and is free and available to any laboratory on campus. EH&S will deliver the chemical to your laboratory if you request a chemical from the program.

To donate chemicals to the program, contact EH&S' Hazardous Waste Program <https://www.ehs.ucsb.edu/hazwaste> or submit a hazardous waste pickup request. In the notes section write "chemicals are for the surplus chemical program". The chemicals need to be in good condition, stable, not contaminated and something common enough that other labs will use.

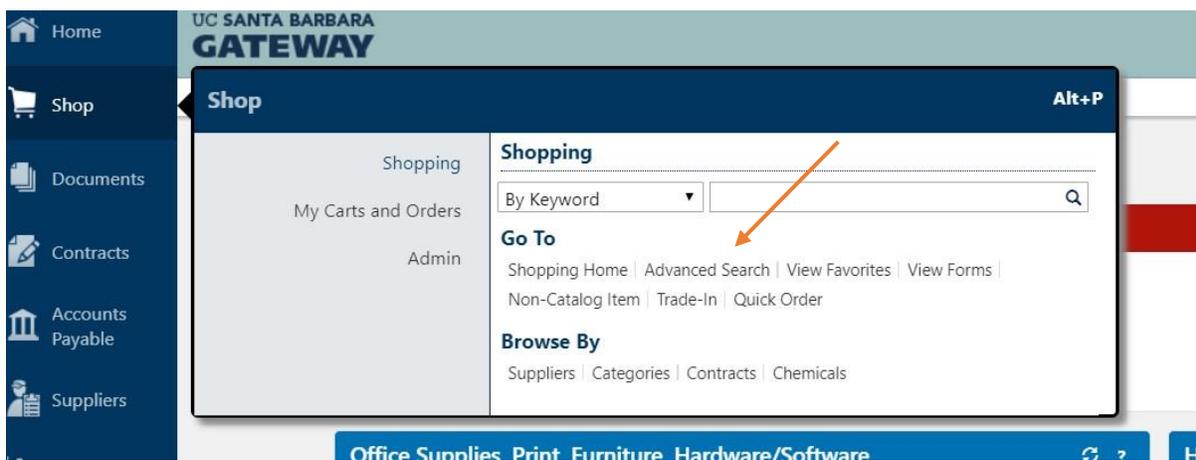

The Surplus Chemical Program is hosted on the UC Santa Barbara Procurement [Gateway](#) web site. To view the list of chemicals available you will need a UCSB Net ID and password to visit.

How to use Surplus Chemicals

Login to Gateway using your UCSB Net ID and Password: [Login to Gateway](#)

There are two ways to search for free chemicals in Gateway:

Option 1: Search by the Supplier name "UCSB Chemical Surplus" using the Advanced Search option and all of our available chemicals will be listed. Scroll down to the chemical you want or type a keyword in the search, and then click "Add to Cart."
