Safe Work Procedure Checklist:

1. PRE-Operation:
   - Task (e.g. Drawings, instructions, specifications etc) is clearly understood.
   - Make sure the work area is clean and clear of grease, oil and any other flammable materials.
   - Keep the welding equipment, work area and gloves dry to avoid electric shocks.
   - Make sure the gloves, welding gun and work leads are in good condition.
   - Check that other work areas are protected from flash.
   - Make sure appropriate ventilation is in place prior to use.
   - Make sure appropriate PPE is worn.
   - Identify ON/OFF switch and emergency stop button (if applicable).

2. Operation:
   - Keep hands clear of work piece and away from electrode.
   - Make sure machine is correctly set up for current, voltage, wire feed and gas flow.
   - Make sure work return cables make firm contact to provide a good electrical connection.
   - Never leave the welder running unattended.

POST-Operation:
   - Switch off machine and fume extraction (if relevant).
   - Close gas cylinder valve.
   - Hang up welding gun and welding cables.
