# Steps to Obtain Free Personal Protective Equipment (PPE):

## UC Personal Protective Equipment Policy Requires:

1. Assess and document the hazards of the work place (by using the online application Assessment
2. Provide to each lab member PPE at no cost;
3. Provide documented training on proper PPE use and maintenance;
4. Provide free method for workers to clean/sanitize their PPE (free laundry program);
5. The minimum PPE requirements for entering a laboratory are long pants or equivalent and closed toe shoes. When one engages in hazardous activity or when in close proximity to hazards lab coat and safety eyewear are required.

## Additional PPE Programs

1. **PPE Recycling program**- we collect unwanted lab coats/eye wear for laundry/wash and re-use. Just look for the black bins labeled with "PPE Recycling" at each laundry location.
2. **PPE Loaner Program** for individuals only working for short periods on campus.

## Questions and/or technical problems?
